

Empire Industries' Rooftop Support Blocks are pre-assembled and readily available through our vast distributor network. Rooftop blocks provide an easy to install rooftop support system for, natural gas and refrigeration piping systems, cable tray, electrical conduit, multiple lines, HVAC equipment and many other applications. The strut channel is pre-galvanized and offers greater resistance to corrosive environments. The 100% recycled rubber base is UV resistant, suitable for installation on most types of roofing material or other flat surfaces and is compatible with all types of strut components. It is designed with a drainage channel to aid water flow and will not float.

7510RT - ROOFTOP SUPPORT BLOCK 10"

FIG. 7510RT
Rooftop Support Block 10"
STRUT CHANNEL:
N/A

FIG. 7510RT7200Z
